

How the
Company
Began

Graham Ellem

As a farmer in the early 1990's, he was trying to manage a sheep and cattle property through a severe drought.

As with all droughts there was heart ache and desperation in trying to keep animals alive with just a little feed.

Experience and Dedication

It wasn't until Graham introduced a range of plant based, colloidal clay and basalt minerals to the animals that he saw some positive signs in the animal's health.

As a result of this very positive experience, Graham dedicated himself to get involved in research and the study of mineral nutrition.

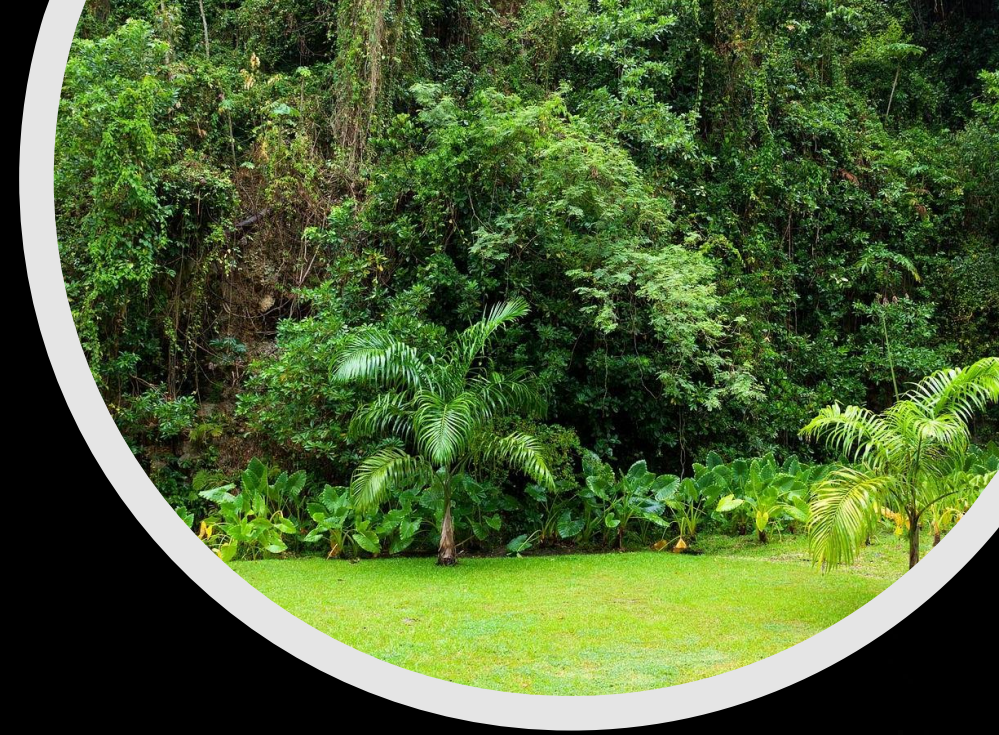

After years of research and experience, Graham found that he was able to rectify many nutrient imbalances that confront our society today.

This is the experience and dedication that forms the basis of Paradise Nutrients

**Paradise Nutrients is situated
in the 4th most nutrient rich
valley in the world!**

**This is the beautiful Lockyer Valley, about one
hour's drive west of Brisbane in Australia.**

100% Australian

- **100% Australian Owned and Operated**
- **A Member Profit Sharing Company**
- **Helps secure our children's, and our children's children, future and health**
- **We need to support this "true blue" Aussie Company**

It's Global!

- **With over 75+ products... that are**
- **Organic wherever possible... and**
- **Shipped to over 40 countries around the world**

Not only do they carry a range of pure minerals, both in capsule and liquid form, but they also enhance many other nutritional products and have many more in the development stage.

On top of that they have developed:

An extensive range of **non-toxic** home and personal care products, organic plant fertilisers, pet and farm foods etc.

Over 75 products packed with mineral nutrition for the general well being of humans, plants and animals

Sources from exotic places around the world

Based on research and sound knowledge of age old unquestionable benefits and proven experiences

Sensitive to nature, and...

Kind to ourselves without compromising the quality and standard of each product.

Highly Concentrated and Safe to Use!
